

UPDATE ON CORONARY AND STRUCTURAL INTERVENTIONS

Bubbio (AT) - Saturday, November 27, 2021

Scientific Program

Part 1 - Coronary

9:00-9:30

Why PCI does not prevent Myocardial infarction?

Why all randomized trial of PCI vs surgery failed?

Patrick Serruys

9:30-9:50

Pd/Pa cases: a novel approach to revascularization

Antonio Colombo

9.50-10.00

3 questions that young interventionalists from audience want to ask to experienced operators

10.00-10.30 Answers

10.30-11.00

Why implanting a stent is the optimal strategy for revascularization and DCB should be used only for ISR and small vessels?

Bernhard Reimers

11.00-11.15 *Coffee Break*

11.15-11.30

3 interesting cases of coronary complications

11.30-12.00 Discussion

12.00-12.30

How I approach complex anatomies and what I do to minimize stent length

Carlo Di Mario

12.30-13.30 *Lunch Break*

Part 2 - Structural

13.30-14.00

A glimpse into the future: structural intervention from 2012 to 2022

Eberhard Grube

14.00-14.15

My view

Francesco Maisano

14.15-14.50

A “Mature” Cardiac Surgeon point of view

Ottavio Alfieri and Hendrick Treede

14:50-15.00

Should cardiac surgeons be by my side during structural interventions?

Antonio Colombo

15.00-16.30

Interesting cases and complications in structural intervention

Faculty and Fellows

16.30-17.00

Cardiac Surgery and Transcatheter Structural procedures in Germany

Hendrick Treede

FACULTY

Ottavio Alfieri - Italy

Antonio Colombo – Italy

Carlo Di Mario – Italy

Eberhard Grube - Germany

Hendrick Treede – Germany

Francesco Maisano - Switzerland

Bernhard Reimers - Italy

Patrick Serruys – The Netherlands
